# Understanding your care + network

## Network providers are your best option

You can use any doctor, clinic, or hospital that's currently part of the extensive Medica network. You don't need a referral. Providers in our network can change at any time, so check to make sure your provider, clinic, or hospital is still in the network before your appointment.

Visit **Medica.com/SNBCDoctors** to use our searchable provider directory. You can also work with your Care Coordinator or call Member Services at **1 (877) 379-7540** (TTY: **711**) for help, this call is free.

## Stay healthy with preventive care

Preventive care, including vaccines and screenings, is the best way to help avoid major health problems.

Vaccines against flu, COVID-19, and others help keep you, your family and your community healthy. Regular screenings can catch health issues early, when they're easier to treat.

Find recommended preventive care at **Medica.com/Prevention**.

Our "How to Get the Care You Need" guide gives you information about how to get the most out of your plan, including:

- Connecting to the care you need
- Understanding what we do for you
- Important phone numbers and resources

2. Use a pill organizer to sort your medications by day. Use more than one if you need to organize morning, lunch, dinner, or bedtime medications.
3. Set your alarm or post a note on your phone, refrigerator, TV, or computer to alert you.
