Medica AccessAbility Solution® Enhanced Fact Sheet

Overview
Medica offers AccessAbility Solution® Enhanced for Minnesota Health Care Programs (MHCP) enrollees in the Special Needs BasicCare (SNBC) program. This product is for members with disabilities ages 18 through 64 who are enrolled in both Medicare and Medical Assistance. Medica assigns each member to a care system that is based on the member’s selection of a primary care clinic during enrollment. Members are able to change their primary care clinic on a monthly basis. Each member is assigned a Care Coordinator, typically a registered nurse or independently licensed social worker, who conducts a person-centered assessment upon enrollment and again at least annually, arranges for services, and assists the member in navigating the healthcare system.
