Overview:

Medica with CHI Health Direct Primary Care (DPC) is an innovative collaboration between CHI Health and Medica that is pioneering new ways of delivering care that will provide better experiences for members. By delivering high quality care with a coordinated approach between insurance coverage and patient care delivery, the health care process is simplified and lowers costs for consumers.

Medica with CHI Health Direct Primary Care (DPC)

Medica with CHI Health Direct Primary Care is an innovative plan combining a Direct Primary Care (DPC) model with coverage for specialists and hospitalizations. Members must use their DPC provider for primary care services, which are covered at no cost to the member. They have open access for specialty care and hospital services. Members will have no coverage for non-preventive primary care services outside of their DPC provider, and higher deductibles and out-of-pocket expenses for non-network specialty and hospital providers. To verify which providers are included in this product’s network, see the provider directory on medica.com.
